

**Installation Note**

- When installing the tiles, check the tile's spec, shade, bulk lot, etc. Indicated on the carton box, and tiles of different bulk lots should be installed separately.
- After installation, clean the tiles right away to get rid of any viscous sundries.
- When installing the glazed or rectified wall and floor tiles, we suggest to leave respectively spaces of 2~4mm or 1~2mm between the adjacent tiles.
- For better pattern, install the tiles as per the matched design pattern, otherwise follow the logo's direction on the back of tile.

**Care and Maintenance**

- Use household detergent, soap with little ammonia or linseed oil and turpentine mixture, etc. For daily cleaning. If some strong colorant like ink sprays on the surface of the tile, please clean at once.
- For cure of tiny scratches on the tiles, first spread some toothpaste, then wipe repeatedly with soft dry cloth.
- All the contamination should be immediately removed or cleaned according to the following tips of maintenance.

Kinds of Stain	Maintenance
Tea, Juice, Coffee, Ice, Cream, Iron or Rubber Marks	Acidic Detergent or Diluted Hydrochloric Lotion
Paint, Grease, etc.	Oil of Bananas (Caution Flammable)
Wet Cardboard or Other Colorant	Bleacher
Ink	Sodium Hypochlorite Lotion or Alcoholic, Detergent
Chalk Marks or Gentian Violet	Chlorylene or Acetone
Wax	Alkaline Lotion
Cement or Sand Slurry	Diluted Hydrochloric Acid or Acidic Lotion etc.
Metal Scratches or Pen Marks	Sodium Hypochlorite Lotion or Detergent
Floating ash	Almighty detergent
urine-stained	Toilet cleaner
Bear and wine	Sodium Hypochlorite Lotion or Detergen
